

14th International Symposium on

PEDIATRIC NEURO-ONCOLOGY

June 20 - 23, 2010

VIENNA, AUSTRIA

Save the date!

Dear Colleagues,

It is with great pleasure that we invite you to the 14th International Symposium on Pediatric Neuro-Oncology - ISPNO which will take place in Vienna, Austria, in June 2010. This meeting welcomes oncologists, neurosurgeons, radiation oncologists, neurologists, nurses, basic researchers, neuro-pathologists, neuro-radiologists, endocrinologists, psychologists, and social workers involved in the care of children with central nervous system tumors.

Over the past decade ISPNO continued to attract a growing number of attendees and it is the premier event in the pediatric neuro-oncology community at which new information and results can be shared and new collaborations can be established. The program will feature plenary and poster sessions, as well as an Education Day.

The meeting will be held from Sunday, June 20, 2010 through Wednesday, June 23, 2010. As meeting place we have chosen the Trend Hotel Savoyen. It is located in the city centre next to the Belvedere garden palace, once the Baroque residence of the renowned general and art connoisseur Prince Eugene of Savoyen, with many other sightseeing attractions at walking distance. Weather in Vienna is usually lovely in June with plenty of opportunities to enjoy the multifaceted cultural attractions of Vienna. We encourage you to register early and secure your room at the meeting hotel where a special conference rate was negotiated. Please check back for more information as meeting plans are finalized.

We will spare no effort to make your visit to Vienna an unforgettable one and invite you to join us in creating a program which will enhance all participants' knowledge, thereby advancing high-quality care for children with central nervous system tumors.

We are looking forward to welcoming you to ISPNO 2010 in Vienna.

Irene Slavc, M.D.

Neuro-Oncology
Associate Professor
Department of Pediatrics
Medical University of Vienna

Thomas Czech, M.D.

Associate Professor and Vice Chairman
Department of Neurosurgery
Medical University of Vienna
